

CHANDRASEKHAR RAO THOGIRI

Full Stack Engineer • React.js • JavaScript • Node.js • AWS Certified Solutions Architect

chandutogiri3@gmail.com | +91 9182886496 | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Engineer with 4.5 years of experience building scalable, high-performance enterprise web applications using React.js, JavaScript, and Node.js. Experienced in end-to-end full-stack delivery — from responsive, accessible frontends to RESTful API design, microservices integration, and NoSQL database management. Proficient in Agile/Scrum delivery, CI/CD pipelines, Docker, and DevSecOps practices on AWS. AWS Certified Solutions Architect. Seeking a role to design and ship reliable, full-stack solutions that drive measurable business impact.

TECHNICAL SKILLS

Frontend:	React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Redux, Context API, Hooks
Backend:	Node.js, Express.js, Python, REST APIs, Microservices, Serverless (AWS Lambda)
Databases:	MongoDB
DevOps:	Git, AWS, Docker, Spinnaker (CI/CD), Ansible, Linux, Agile / Scrum
Cloud:	AWS — EC2, S3, Lambda, IAM (Solutions Architect Associate Certified)
Monitoring:	Splunk
Languages:	JavaScript, Python

EXPERIENCE

Full Stack Engineer / Software Engineer • [Tata Consultancy Services](#)

Oct 2021 – Present •
Hyderabad

Full-Time • 4.5 years

[Full Stack & Frontend Development](#)

- Built and maintained React.js dashboards used by 200+ engineers for real-time system monitoring — owned the full UI lifecycle from wireframe to production, following component-driven architecture and clean code practices.
- Built a shared React component library (20+ components) adopted across 4 internal teams, cutting duplicate UI code by ~40% and accelerating onboarding for new developers.
- Designed and developed RESTful Node.js/Express.js APIs backed by MongoDB, serving structured data to multiple frontend applications with consistent schema contracts.
- Integrated REST APIs into React UIs for live data feeds — implemented loading states, error boundaries, retry logic, and auto-refresh patterns for production reliability.
- Optimised frontend performance using code-splitting, lazy loading, and memoisation; improved page load speed and reduced bundle size measurably in production.

- Built fully responsive, accessible UIs following WCAG guidelines and secure development practices, ensuring consistent usability across all screen sizes and devices.

DevOps, Testing & Agile Delivery

- Delivered features in Agile/Scrum teams using AWS developer tooling for sprint planning, backlog management, code reviews, and release tracking — consistent 2-week delivery cadence across multiple projects.
- Automated CI/CD pipelines via Spinnaker and Docker containers, enabling reliable deployments across dev, staging, and production environments with zero-downtime releases.
- Set up Splunk dashboards to surface application logs and error trends, enabling faster root-cause analysis during production incidents.
- Automated repetitive operational tasks (server patching, health checks) using Python and Ansible, freeing up engineering bandwidth for feature development.
- Supported AWS infrastructure (EC2, S3, Lambda) and assisted with post-cloud-migration stability verification and security hardening.

PROJECTS

ShareAPlate — Food Donation Platform (React · Node.js · Firebase · Vercel) Aug 2023 – Present
Stack: React.js · JavaScript · Node.js · Vite · Firebase Auth · Firestore (NoSQL) · REST APIs · HTML5 · CSS3 · Vercel

- Built a full-stack food donation platform with a React.js frontend and Node.js REST API backend, using component-based architecture and React Hooks for dynamic state management.
- Integrated Firebase Authentication for secure user login/signup flows and Firestore (NoSQL) for real-time donation data management, including role-based access for donors and receivers.
- Developed modular, reusable UI components — donation feeds, dashboards, request cards, and auth screens — following clean code practices and responsive design principles.
- Implemented fully responsive, mobile-first UI using HTML5 and CSS3, ensuring consistent usability across all device form factors.
- Deployed on Vercel with a scalable architecture; designed backend REST API layer for future microservice expansion and third-party integration.

EDUCATION

B.Tech — Computer Science & Engineering

Aug 2017 – Jul 2021

Vignan's Institute of Information Technology · Visakhapatnam, India

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

Sep 2023 – Present

Amazon Web Services · [View Certificate →](#)

Languages: Telugu (Native) · English (Professional Proficiency)
