

CHANDRASEKHAR RAO THOGIRI

Full Stack Engineer • React.js • TypeScript • Node.js • AWS Certified Solutions Architect

chandutogiri3@gmail.com | +91 9182886496 | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Engineer with 4.5 years of experience building scalable, high-performance enterprise web applications using React.js, TypeScript, JavaScript, and Node.js. Experienced in end-to-end full-stack delivery — from responsive, accessible frontends to RESTful API design, microservices and serverless architectures, and relational/NoSQL database management. Hands-on with integrating Generative AI and AWS AI services into enterprise applications. Proficient in Agile/Scrum delivery, CI/CD pipelines, automated testing, Docker, and DevSecOps practices on AWS. AWS Certified Solutions Architect.

TECHNICAL SKILLS

Frontend:	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Redux, Context API, Hooks
Backend:	Python, REST APIs, Microservices, Serverless (AWS Lambda)
Databases:	MongoDB (NoSQL)
DevOps:	Git, Azure DevOps, Docker, Spinnaker (CI/CD), Ansible, Linux, Agile / Scrum
Cloud:	AWS — EC2, S3, Lambda, Bedrock, IAM (Solutions Architect Associate Certified)
Monitoring:	Splunk
Languages:	JavaScript, Python

EXPERIENCE

Full Stack Engineer / Software Engineer • Tata Consultancy Services

Oct 2021 – Present • Hyderabad

Full-Time • 4.5 years

Full Stack & Frontend Development

- Developed and maintained responsive, component-based web applications using React, following reusable and modular design patterns to keep the codebase consistent and easy to extend.
- Built interactive data visualizations, ensuring data is displayed accurately and in the correct sequence/order as defined by business logic.
- Implemented light/dark theme support with a consistent, accessible color system across the application.
- Managed data fetching, caching, and state using React Query (TanStack Query), including coordinating multiple concurrent API calls.
- Designed filterable, searchable interfaces with sorting and drill-down detail views to improve data exploration for end users.
- Debugged and resolved UI and data issues in shared components, carefully validating changes to avoid regressions elsewhere in the application.
- Used Git for version control — branching, committing, and collaborating with the team through code reviews and pull requests.
- Collaborated with cross-functional stakeholders to translate business requirements into functional, polished UI features.
- Wrote clear documentation for features to support onboarding, demos, and stakeholder training.

DevOps, Testing & Agile Delivery

- Automated CI/CD pipelines via Spinnaker and Docker containers, enabling reliable zero-downtime deployments across dev, staging, and production environments.
- Set up Splunk dashboards to surface application logs and error trends, enabling faster root-cause analysis during production incidents.
- Automated repetitive operational tasks (server patching, health checks) using Python and Ansible, freeing up engineering bandwidth for feature development.
- Supported AWS infrastructure (EC2, S3, Lambda) and contributed to post-cloud-migration stability verification and security hardening.

PROJECTS

Stack: [React.js](#) · [TypeScript](#) · [JavaScript](#) · [Node.js](#) · [Vite](#) · [Firebase Auth](#) · [Firestore \(NoSQL\)](#) · [REST APIs](#) · [HTML5](#) · [CSS3](#) · [Vercel](#)

- Built a full-stack food donation platform with a React.js + TypeScript frontend and Node.js REST API backend, using component-based architecture and React Hooks for dynamic state management.
- Integrated Firebase Authentication for secure user login/signup flows and Firestore (NoSQL) for real-time donation data management, including role-based access for donors and receivers.
- Developed modular, reusable UI components — donation feeds, dashboards, request cards, and auth screens — following clean code and responsive design principles.
- Implemented fully responsive, mobile-first UI using HTML5 and CSS3, ensuring consistent usability across all device form factors.
- Deployed on Vercel with a scalable architecture; designed backend REST API layer for future microservice expansion and third-party integration.

EDUCATION

B.Tech — Computer Science & Engineering

Aug 2017 – Jul 2021

Vignan's Institute of Information Technology · Visakhapatnam, India

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

Sep 2023 – Present

Amazon Web Services · [View Certificate →](#)

Languages: Telugu (Native) · English (Professional Proficiency)
